## Stock Performance

## Adanac Gold Property

- In the heart of the Abitibi where in excess of 150M oz gold have been produced.
- Discovery of an 1.8 kilometre gold mineralized corridor!
- Shallow drilling done to date to test gold mineralization.
- Approximately 5,000m diamond drilling program to test mineralisation at depth
- Adjacent to Gold Bullion properties

## South Bay

- Recent stripping and channelling program produced up to 27 g/t sample
- Short holes were drilled to test structure (Assays pending)
- Secured land position prior to drilling by collecting 53 claims from Plato Gold Corp and additional claims by physical staking
- A follow-up drilling program will be planned for summer 2011

## Duverny (Standard Gold Mine)

- The Duverny property includes the past-producing Standard Gold Mine.
- The Standard gold mine operated intermittently between 1935 and 1953, producing an unknown quantity of gold.
- The mineralization is contained within a diorite sill trending southeast with a width ranging between 150 metres to 200 metres.
- The sill has been traced through its geophysical signature over a distance of three kilometres and will be a high priority exploration target.

## Lemieux Dome

- Our claims cover 150 square km in the hearth of Gaspesie
- 50 km from Murdochville Gaspé Copper Mine in production for 45 years
- Copper Zinc, Lead, Silver and Gold were assayed in our previous drilling programs
- Assays pending from our 2010 drill program.
